

Items to be Certified in a Later Stage

Scotland

Items to be Certified in a Later Stage

All items in a staged project which are to be certified in a later stage should be added to this schedule.

Both SER and non-SER certified items should be entered into this section, as there is now the option of including non-SER stages in the certificate (refer to the 'Generate New Certificate – Staged' tutorial for more information)

This section should be left blank if there are no more stages to add to the project or if this is a non-staged project.

Items to be certified in a later stage

ACC: SER1-D-000000

Leave this section blank if this is a non-staged certificate

Please provide a description of any items that will be covered by future design certificates
